

How to change the language used on a LILIN NVR Touch

If your NVR is not in your required language, please use the steps below to change the settings:

- 1) Move the mouse up to the top left of the NVR's live record window. Please click the 'Cog' icon.

- 2) From the menu bar across the middle of the screen, select the 'Cog' icon once again.

- 3) From the NVR's main menu, select the option located second from bottom - from the bar on the left of the screen.

- 4) Now adjust the language option - the option underlined in the image below.

(Regardless of the language set on the NVR the menu locations will remain in the same place).
