

# Merit Lilin Technical Support Document

Document Number: Q00038

Date: 11/13/2010

Dept: Technical Support, Taipei

**Subject:** How to enable UPnP service on Windows Vista or Windows 7 for LILIN SX series IP cameras.

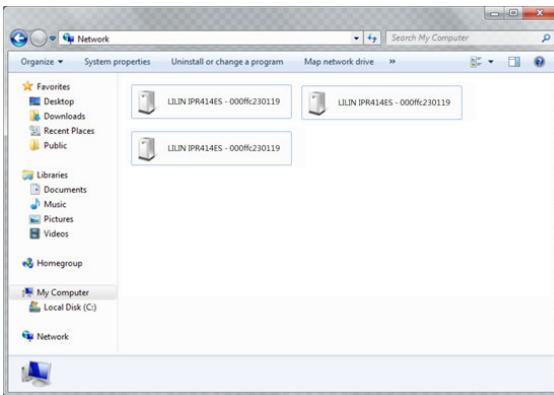

**Firmware requirement: 0.0.50**

To enable and turn on UPnP service or Network Discovery in Windows Vista, please follow the following steps:

1. Select Control Panel.
2. Click on Network and Internet link, and click on Network and Sharing Center.
3. Enable “Network discovery”.
4. Click “Turn on network discovery”.

5. Please open up File Explorer in Windows Vista or Windows 7 and click on Network item. IP cameras scanned will get listed on File Explorer.

6. If IP camera is not scanned, please make sure that UPnP service is opened at Configure->Network->UPnP service.
