Merit Lilin Technical Support Document
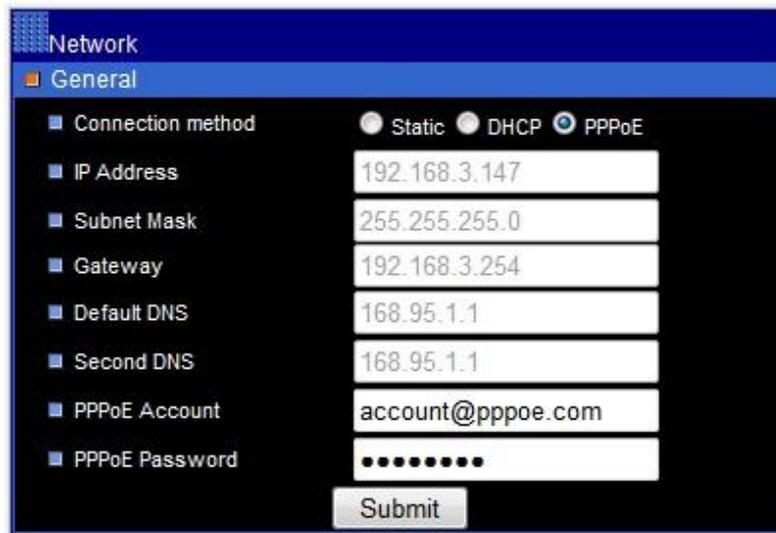

Subject: The E-mail SMTP settings of LILIN iMEGAPRO IP Camera for Yahoo and Gmail.
Description: This document describes the settings of iMEGAPRO 2 or 3MP IP Cameras to send an alarm email via Yahoo or Gmail accounts.

The description of settings:
Step1: First of all, go to "Network" and click "General". Select a connection method to PPPoE or Static IP.   The example is described with PPPoE Dial Up Connection.

Step2: Please go to **Network**->**SMTP Service** for the following settings

 1. E-Mail Receiver Setting:
    There are several settings to be set for the E-Mail Receiver Setting as shown below.

    a. Settings of E-mail Address: There are 5 sets of E-mail Address which can be added from E-mail Address 1 to 5.
    b. Settings of E-mail sending rules: You can simply select the time intervals to send the E-mail for Auto E-mail sent and Alarm/Motion E-mail sent.

 2. E-mail Sender Setting:

    a. E-mail Address: Please fill in the SMTP for Yahoo or Gmail account.
    b. SMTP Server:

For Gmail, please fill in "smtp.gmail.com".
For Yahoo E-mail, please fill in "smtp.mail.yahoo.com".

    c.   SMTP Authentication: Please check "AUTH SSL".
    d.   SMTP Port:

For Gmail, please fill in "465".
For Yahoo E-mail, please fill in "465".

    e.   Authentication: Select "Enable".
    f.   Auth Account and Password: Please fill in the E-mail address and password and select "Submit".

3. After finish the above settings, please fill in the E-mail Subject and Content to test the E-mail.
