

## Merit LILIN Application Note

### SmartEvent Playback on CMX 3.6

Document Number : A00046

Date : 2014/05/15

Dept: Technical Support, Taipei

**Subject:** LILIN CMX 3.6 supports SmartEvent playback for POS, RFID, barcode scanner, access control, and ANPR.

CMX 3.6 supports SmartEvent playback that allows keyword search for video playback across channels in full screen. CMX 3.6 can capture transactions from POS, RFID reader, barcode scanner, access control, and ANPR across channels.

1. To search a keyword, click on Search button.
2. Enter the keyword.
3. Select SmartEvent button.
4. Specify preview and post event review dwell.

Search

Condition: SNOOPY

Preview Seconds: 1

Postevent Review Seconds: 5

OK Cancel

Click on OK button. Video playback within the preview dwell is displayed in full screen mode based on the keyboard across all channels on the platform.

### Applications:

Airport luggage video tracking system  
Production line video tracking system  
Transportation cargo video tracking system  
Guard tour patrol video management system

Main Grouping
