

How to change the local alert made by the Door Station when the ring button is pressed

- When the door station ring button is pressed by someone at the door it is possible to have the door station play an alert noise to confirm the button has been pressed.

This alert can be changed or disabled as required.

- To change or disable the alert sound that is played when the door station ring button is pressed, log in to the Door Stations' web browser and select '**Setup**' from the top right hand side of the live display.
- Once in the '**Setup**' menu select 'Advance Mode' from the bar at the top.
- Next select '**Event**' and then '**Door Station**' from the menu on the left and then the '**Ring Button**' option.
