

Merit LILIN Application Note

How to use Mask Detection for NAV

Document Number: A00301

Date: 2020/03/04

Dept: Technical Support, Taipei

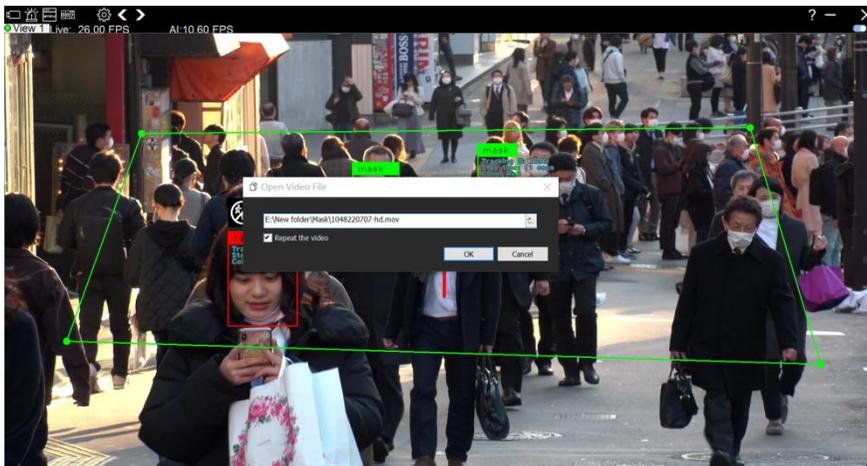

Subject: Mask AI detection

Requirement:

1. Intel 6th generation or above CPU PC
2. OpenVINO or CUDA

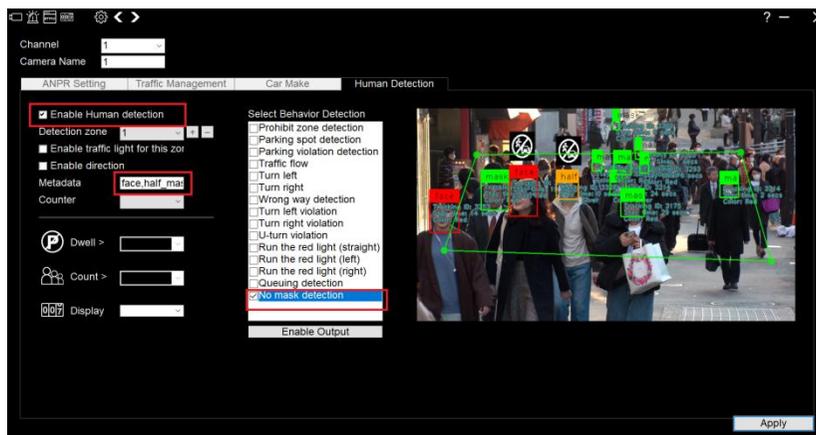

Step #1 Testing

Please download demo video [here](#). Or, you can use LILIN IP camera for testing purpose.

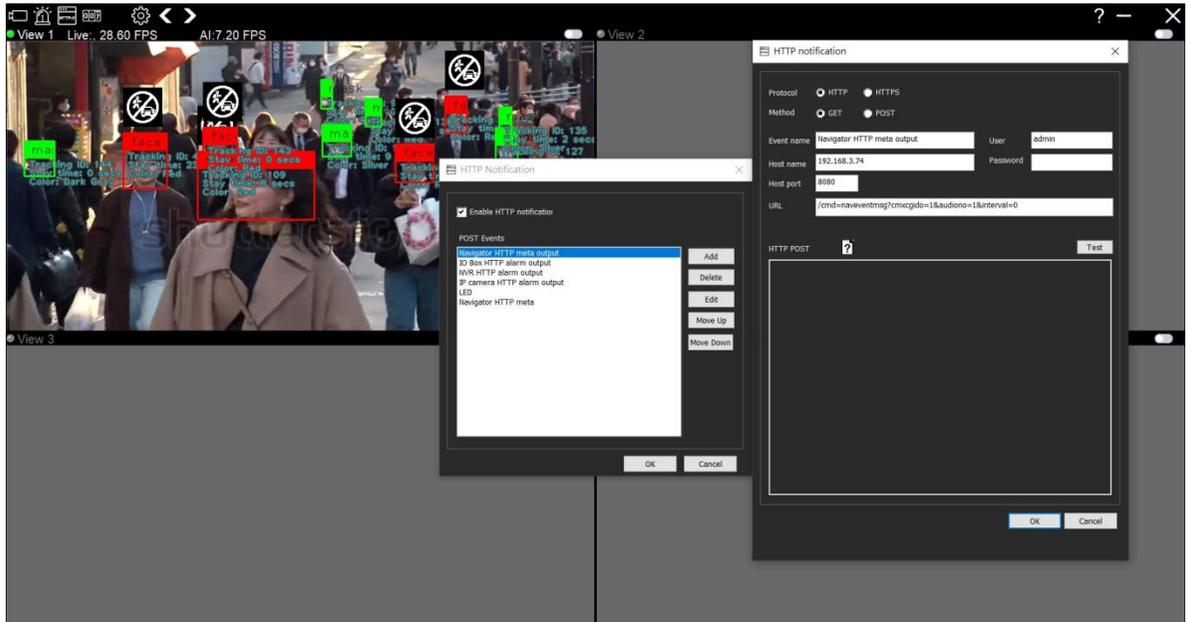

Step #2 Enable Human Detection

Create a zone and specify face, half_mask for detecting detection.

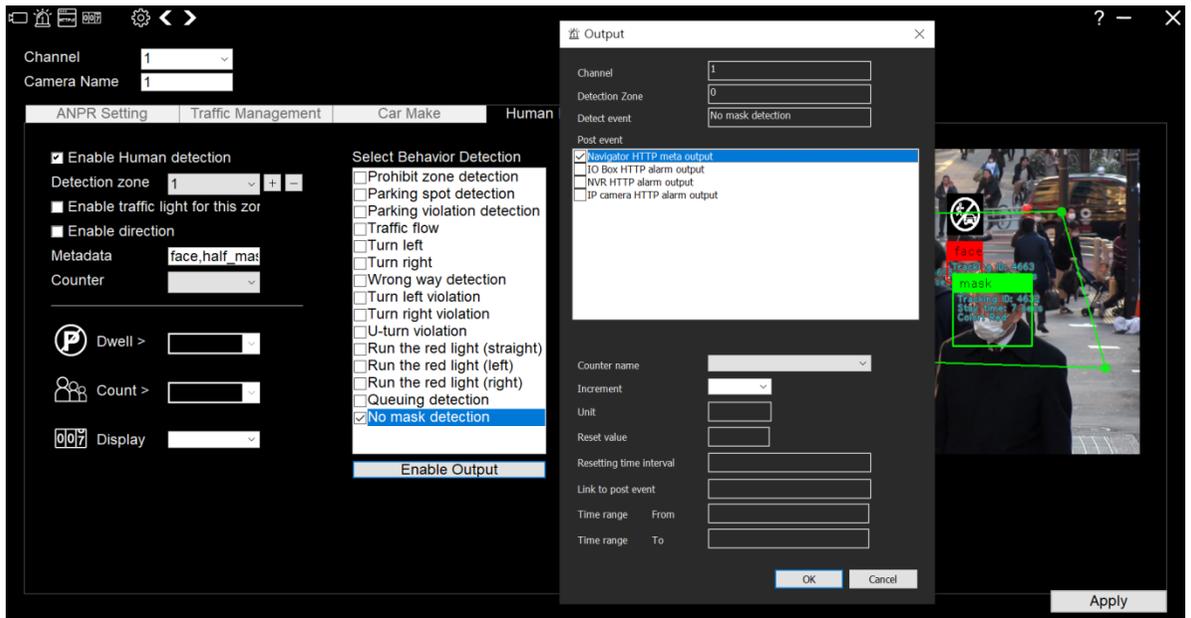

Step #3 Configure HTTP Post

Type URL, /cmd=naveventmsg?cmxcgido=1&audiono=1&interval=0, to the URL. This is to notify LILIN Navigator for playing an audio.

Step #4 Enable the HTTP Post Notification to No Mask Detection.

Visit [A00157.PDF](#) for configuring a output via Navigator such as audio output “please wear a wask.”

Contact lilin.zendesk.com for technical support.
